

# Introducing Digital Mammography.

## Advanced imaging with increased comfort.

DeKalb Regional Medical Center is proud to introduce Digital Mammography, a powerful new tool in the fight against breast cancer. It also makes getting your mammogram faster and more convenient than ever before.

Digital Mammography provides higher quality images and helps clinicians detect breast cancer at an earlier stage. And, because we use a MammoPad® for every patient exam, we help make your experience warmer, softer and more comfortable.

Talk with your physician to schedule your annual mammogram today. Or, call 256-997-2844 for more information.
